

# Gilles VIEIRA

## Summary and objectives

---

### Who am I?

I'm a modeller looking for new adventure. after an academic curriculum and a PhD in bioinformatics and biostatistics, I joined the world of startups in which I have been evolving for about a decade.

Since my thesis, I decided to focus on product design thanks to the opportunity to propose and develop my own subject. From then, I favour projects at a very early stage, and in new domains to bring a new vision while learning the new concepts of the profession.

I have always been very involved in community life, as a student I participated in competitions[1] and I was the only student admitted to a national research group in synthetic biology[2]. Today I have moved on to the organization and animation of events, whether scientific: former organizer of the meetup big data science Montpellier[4], lecturer in the university diploma in data management and management[3]; or technical: member of the Montpellier Tech Hub[5] which organizes the life of the tech meetup and Sunny Tech, the first tech conference in tech conference in Montpellier[6].

### What can I offer you?

- More than 15 years of professional experience in statistical modeling, machine deep learning and IA.
- My multidisciplinary thinking skills, mixing boolean (computer science), probabilistic, and diversity (biology) thinking.
- My knowledge in various fields: biotechnology, medtech, adtech, deeptech video image and sound.
- Expertise in product design, idea formalization, and concept maturation..

- Habits of early stage startups, and pitfalls to avoid.
- My best practices acquired in ISO certified environments.
- My professional network

### What am I looking for?

- A team, and leaders who like to be challenged.
- Challenges to overcome in data sciences.
- To make ideas concrete, to go from the blank sheet to the product.
- In biotech, medtech, ecology, accessibility, inclusiveness, social, but not only...
- A partnership with the university (in progress, or to be created).
- Montpellier (France) or Full remote (more than 2 years on full remote)

### On internet

- My email [vieira.gille\[@\]gmail.com](mailto:vieira.gille[@]gmail.com)
